## FILTRATION OF KITCHEN SMELLS WITH CAMCLEANER CITY AIR PURIFIER

### ABOUT THE PROJECT

Employees at the EADS offices in Suresnes (near Paris, France) had complained about dirty water odours in the corridors which were coming from the siphons of the showers and sinks.

### SOLUTION

Camfil installed a CamCleaner CITY unit on the landing area to clean the air and remove odours within the room. This new generation of air purifier has a triple filtration stage: HEPA filtrations and double molecular filtration stage.

### ADVANTAGES OF THE CAMCLEANER CITY:

- It stops indoor air pollutants, VOCs and particles.
- Unlike other air cleaners which use other technologies, it doesn't generate any secondary compounds harmful to human health.
- Thanks to its simple and modern design, it can be installed everywhere indoor.

### RESULTS

After the installation of the CamCleaner CITY, the client reported that there were no longer odours within the corridor and as a result of their satisfaction, they put plans in place to install further CamCleaner CITY units throughout the other facilities.

CAMCLEANER CITY

# CAMFIL CASE STUDY

## CAMFIL CITY M ADVANTAGES:

- Healthier employees
- Less cleaning
- Lower energy costs
- Reduced environmental impact
- Clean products, fewer operational disruptions

## PRODUCTS USED:

**CamCleaner 300**  
(environments up to 100m<sup>2</sup> )

**CamCleaner 800**  
(hospitals, offices, homes, schools)

**CamCleaner 2000**  
(industrial premises)

**CamCleaner 6000**  
(large industrial environments)

**CamCleaner CITY**

## TESTIMONIAL

“Thanks to this solution, there is no need to re-prime the siphons every week as before. This operation used to take 15 minutes. CamCleaner CITY air cleaner has also efficiently removed glue smells due to renovation works on the ground floor. Before the installation of the air cleaner, we were smelling the glue from the fourth floor and it was bothering the employees”
